

Dizzy Twister Art Project

Weather

WHAT YOU NEED

- plastic bottle
- black paint
- newspaper
- tape
- wire and cable
- bubble wrap
- sequins
- white tissue paper
- glue
- silver paint
- bottle caps

1 Roll and twist pieces of newspaper and tape around the plastic bottle in a spiral shape.

2 Cover the whole of the structure with glue and finish off with a layer of white tissue paper. Leave to dry.

3 When dry, paint it black and then wrap and twist pieces of wire and cable around the twister.

4 Thread bottle caps with wire, and hang from the twisted cable. Attach sequins all over, and paint silver blobs at intervals to catch the light.

Turn your tornado around and around and listen to the whistling, clanking sound it makes. Just like the real thing!

Turning,
Twisting,
Spinning!
